

D4Well

Efficient and simple water purification of the water from your own well

With the easily installed D4Well the water from your own well in your house or summer cottage. The water purification is made by 3 particle filters, one carbon filter and our patented and maintenance-free UV LED system that removes biological contamination without using chemicals or other hazardous substances.

D4Well is easily connected and is fitted directly with standard fittings on your water pipe and to a wall outlet. The energy consumption is very low, despite the high capacity. It can be supplied by portable power sources such as solar cells, batteries and generators, when there is no access to the power grid.

Features

- Very easy and fast to install
- Purifies 300 l/h
- Capability of up to 4.2 million liters of water
- Maintenance free (except filter change)
- Free from chemicals and mercury
- Wi-Fi for monitoring and alarms

Technical data

- Weight: 8 kg
- Dimensions: 600 x 445 x 160 mm (LxHxW)
- Filter types: 1-3 μm , 5 μm , 10 μm och carbon
- Power source: 230 V alt. 12/24 VDC
- Cable Length: 1,2 m alt. 8 m
- Consumption 7 W when water runs
- Connection: 1"
